

Hyperseal High Performance Paints and Coatings from Recycled Materials

HYPERFLEX – CARPARK & DRIVEWAY COATING **Long lasting asphalt & concrete protection**

HYPERFLEX – CARPARK & DRIVEWAY COATING is an advanced new rubberised acrylic paint that seals, repairs and protects asphalt and concrete driveways, carparks, road and pedestrian surfaces. Hyperflex provides a rubber/glass barrier that prevents the effects of environmental weathering. It seals the surface, repairs small cracks and reduces the erosion and wear of both asphalt and concrete. Affordably priced and extremely durable, HYPERFLEX – CARPARK & DRIVEWAY COATING out-performs hot tar and other coatings while being non-toxic and non-carcinogenic.

Benefits

Cost equal to or less than comparable alternatives

Ideal for both asphalt and concrete

Resists chemicals, dirt, mould and stains

Easy to apply with brush, roller or sprayer

Fast application and drying time

Can be applied in cold temperatures
